

## **Technical Data Sheet**

## **Pulse Vacuum Steam Sterilizer**

Model: ICLAVE-350DD-B

The picture is for reference only, which shall not be taken as standard for machine acceptance. For details, it is subject to technical descripti on.

1	Technical d	Jata								
		The system has 32 built-in preset programs, more than 10 kinds of program stage can be flexibly								
	Sterilizing program	configured according to the needs to meet the requirements of different sterilization process.								
		Name	Ster. Temp.	Ster. Time	Dry time	Applicable items type				
		Warm up	134°C	0min	3min	Empty loading, for preheat the device				
		B&D test	134°C	3.5min	4min	B&d test package or a device				
		Fabric	134°C	5min	10min	Fabric package, weight ≤7.5kg/pack				
		Instrument	134°C	5min	15min	Conventional instrument box or basket loading, weight≤ 7.5kg/pack				
		Thermolabile	121℃	20min	15min	Items can't bear 134°C, weight ≤ 7.5kg/pack				
1.		Flash	134°C	4min	1min	Unwrapped instruments				
		Orthopedics	134°C	6min	15min+10min	Orthopedics instruments, weight ≤14kg/pack				
		Leak test				Empty loading, leak rate ≤ 0.13kpa/min				
		Prion	134°C	30min	15min	Special items such as prions				
		Optical	cal 134°C 7min		15min+5min	Inner diameter $\ge$ 2mm, length $\le$ 1500 times inner diameter from the opening side to end				
		Heavy load 134°C		6min	15min+10min	Heavy loading items				
		Small load	134°C 5min		8min	loading capacity < one standard sterilization uni weight ≤7.5kg/pack				
		Open liquid	121℃	30min		Unsealed bottled liquid, volume ≤ 500ml / bottle				
		Gravity	121° <b>C</b>	20min		Gravity steam discharge, non-vacuum

8. Max 9. Cha	tod working tomporaturo	Designed temperature				150°C				
9. Cha	Rated working temperature				134°C					
	Maximum working temperature				139℃					
10 Cha	Chamber structure				Rectangular					
					600×600×980mm / 352Liters					
11. Ove					1215×1880×1200mm					
12. Wei				1080Kg						
13. Inst				Installa	ation on t	he gro	ound			
14. Doo				Hanged door with motor driving						
15. Qua				Single	door					
16. Doo				Up and down						
17. Doo	· · ·			By compressed air with a door gasket sealing						
18. Con				Front side 8" inch color touch screen, 5 level authorization user						
19. Pure	Pure water and water consumption 0.3		0.3^	Must be pure water 0.04m <sup>3</sup> /cycle						
				15~0.3 MPa Soft water, 0.5m <sup>3</sup> /cycle						
	· · · ·			.4~0.7 MPa Oil free & water free						
			Driv	riving power: AC 380 V ± 10% 3 phases 50 Hz						
22. Pow				Control power: AC 220V $\pm$ 10% single phase 50Hz						
23. Pres				nalogue pressure gauge for chamber and jacket on the front panel						
				gital Temperature Display on the front panel (touch screen)						
	ilt-in steam generator		-	kW, working pressure: 0.3MPa						
26. Fitti	Eittings on built-in steam generator			ifety valve, Analogue pressure gauge, Water level gauge, water level ectric cut out, Automatic air ventilate, Control Switch						
27. Wat				ot less than 3 bar should be fitted with a protection against overload and nase failure.						
28. Data	. Data record Bu			illt-in micro printer						
29. Loa	ading mothed			Internal loading cart x 1 and External transfer trolley x 1						
30. Safe	Sataty system			er pressure protect, water level protect, door cannot open in case of essure, door obstacle system, overload protect, and alarming system						
31. cert	1. certification MDI				DD 93/42 EEC ISO ASMA EMC					
2 Cor	Component material									
	Component						Material			
1. Cha	Chamber			SUS304						
2. Jack	Jacket			SUS304						
3. Cha	Chamber insulation material			Rock wool						
4. Cha	Chamber insulation cover			Embossed aluminum sheet						
5. Part	Parts in chamber			SUS304						
6. Doo	Door plate			SUS304						
7. Doo				Silicon rubber						
8. Cha	Chamber support frame			Carbon steel						
9. Pipe				SUS304						
10. Buil	· · ·				SUS304					

11.	Internal loading ca	art		JS304				
12.	External transfer t			JS304				
3	<b>Configuration List</b>	1	·					
No.	Name	Model	Brand	Remark				
1. 2.	Main Chamber body Door	XG1.HW.01 XG1.HW.03	MRC	Class I pressure vessel. Welding by robot Inner chamber is adopted 304 stainless steel; The jacket is 304 steel. The door inner face is adopted 304 stainless steel; It is electric sliding and compressed air sealing, equipped with safety				
	Deensentuel			interlocking and manually controlled open equipment.				
3.	Door control MLCA12-TH switch		OMRON Japan	Operating Reliably, heat resistant, long service life				
4.	PLC	XPC39160	MRC	Strong function, advanced performance, high reliability, Multi communication mode.				
5.	Touch screen	NSC08-60	MRC	8 inch color touch screen, display working process parameters, easy control and operation. Select Program to Run P.Chamber 1.0 kPa P-jacket 210 kPa P.Chamber 25.0 T T-jacket 133.5 T 01 Warm Up 02 B&D Test 04 Instrument 05 Thermolabile 06 Flash 06 Flash 07 Orthopedics 08 Leak Test Vacuum dry 180 Sec Ster. temp 134.0 T Vacuum dry 180 Sec				
6.	Sterilization software	Wincc flexible	MRC	Multi programs, program modularization management.				
7.	thermal printer	WH4008A	MRC	Core made in Japan; multi record channels, sterilizing parameter record, long service life.				
8.	Pressure transmitter	ECO-1-ABS	WIKA, German	Original import from Germany, High precision, high reliability, stable output.				
9.	Pressure gauge	-0.1~0.4MPa	WIKA , German	High precision				
10.	Temperature sensor	Pt100	WIKA , German	High precision, mini-measurement error.				
11.	Pneumatic valve	554 series	GEMU, German	Powerful switch valve, no action error, remote compressed air				
12.	Vacuum pump	2BV series	Nash Elmo, America	Running stable, no water leakage, high reliability, low noisy.				
13.	Air filter	CHL0.2	MRC	Ultra-fine sterile filtration, bacterial eliminating rate ≥99.97%				
14.	Safety valve	0.3MPa	MRC					
15.
